

# BIKEGROOVY®

professional bike wash 

The sustainable  
bike wash  
from Austria

"Many people know that I'd rather ride my bike than clean it – thanks to BikeGroovy, now my bike is clean anyway."

**CHRISTOPH STRASSER**  
6-time winner of the Race Across America

GREEN PROFESSIONAL  
WASHING  
FOR YOUR BIKE

# PROFESSIONAL WASHING FOR YOUR BIKE

You wash your hands with soap. Cars go through the car wash. And bikes? With the BikeGroovy.

Anyone who loves their bike washes it.

Biking is booming. With the result that more people than ever are indulging in cycling to-day. In all its forms: on the racetrack, on cycle paths, on trails, downhill or in the bike park. In the saddles of bikes that can do more than ever, and the price tags reflect that. We look at such bikes. And we not only cherish them, we also keep them clean. Preferably with the BikeGroovy from now on:

**The new dimension in bike care.**

 Just 1.8 litres of water a minute; you can hardly call it consumption.

 Washing at low pressure: gentle enough for e bikes, and the bearings and components will thank you too!

 The chain and components dry rapidly with compressed air. A few drops of oil on the chain, and nothing stands in the way of you enjoying your bike.

 The dosing pump guarantees the exact ratio of cleaner and water.

 Thanks to flow heaters, the bike is kept warm even in places where there's no hot water connection for miles.

 The washing area is as clean as the bike after washing thanks to a splash guard.

 Compact design and made from corrosion-resistant stainless steel.

 The separator separates mud and oil from water – driven by responsibility for nature.

## ADD-ON MODULES

Need a little more Groove?

Configure your BikeGroovy just how you need it: with made to measure add-on modules.

The BikeGroovy brings in the cash with a **coin slot** – and only runs as long as you want it to.

Why lift heavy bikes when there's the practical **roll and hold package** to save your back?

For those who prefer things more modern, there is a convenient **cashless payment system** for their BikeGroovy for card and mobile payments.

If the BikeGroovy is too far away for a compressed air line, there's space in it for a small **compressor**.

BikeGroovy mobile? Even that is possible! **4 wheels** and you can wash bikes wherever you want.

The BikeGroovy stands on **6 solid feet** as standard.

Groovy Berta guarantees gleaming results. The **cleaner** is biodegradable and is therefore soft & green for bikes.

You can also tailor your BikeGroovy to your circumstances and needs. Whether that's the construction (right or left aligned), or the language (the stickers) and the design.

Right aligned BikeGroovy with Italian stickers

The BikeGroovy doesn't just clean, it's also happy to advertise: with **individual branding** according to your specifications.

## BENEFITS

The new dimension in bike care!

BikeGroovy has the experience from 25 years of pioneering work in cleaning technology and industrial systems behind it. And the love of biking – combined with high-quality components, a robust design and perfect craftsmanship.

### A clean result

The BikeGroovy has a clever combination of temperature and cleaner which deals with even the most stubborn dirt.

### Gentle cleaning

Low washing pressure combined with the cleaner and hot water provides gentle cleaning with perfect results.

### A clean affair

Thanks to the splash guard and collecting tray, the washing area stays clean and the surroundings, and even the user, stay dry. The integrated separator separates mud and oil from water – an additional benefit for nature!

### BikeGroovy Eco: sustainability plus

Muscle strength, coordination and perhaps a little bit of battery power: cycling is resource-saving by nature. A principle that BikeGroovy seizes on and takes to its logical conclusion in the form of low water consumption, an oil separator and the biodegradable cleaner.

green

# APPLICATIONS

Added value for cyclists. And their hosts.

Many a cyclist takes great pleasure in ploughing through the mud. But coming home with a dirty bike? No-one likes that.

## For hotels, spa facilities & campsites

Tourism professionals and hoteliers have known for a long time: service makes the difference. That applies for the touring cyclists and bikers among the guests too. The BikeGroovy is one of the differences you can make in service. Because it offers your guests the possibility of washing their bikes easily and conveniently after a tour. Added benefit: the washing area stays clean and dry – ultimately, tidy surroundings are also your business card!

## For cities, communities & tourism associations

Bikers are a highly attractive target market who spend good money where there is something on offer for them. The ability to clean their bikes after the tour and before the journey home as the sophisticated vehicles deserve: that's a rare opportunity. Visitors to a cycling destination value such an indicator of hospitality all the more. And food and drinks after the tour taste all the better when they know their bikes are washed and well cared for.

## For repair shops and hire stations

The technical features of the BikeGroovy make it a natural ally to every repair shop and every hire station. Whether before servicing or after a tour: the BikeGroovy not only cleans bicycles in an appropriate manner, it also keeps the surrounding area dry. With the perfect ratio of cleaner, water and temperature, as well as gentle pressure, which is good for the bearings as well as the gears, etc. You save time and resources in thorough cleaning as a result.

# CUSTOMER TESTIMONIALS

We are convinced, but the opinions of satisfied BikeGroovy users are much more important to us!

Customers who have been won over are best placed to rate how good the BikeGroovy really is:

"We use the system every day and are delighted by the happy customers who collect their bikes again perfectly clean after the service. The system works perfectly and we are very happy to be able to offer this service!"

**David Weichel**  
KW-BIKES TEAM, GELTING, GERMANY

"As a bike repair shop with a lot of customers, being able to clean bikes quickly and reliably is important for us. The BikeGroovy allows us not only to clean bikes thoroughly, but also to be environmentally friendly and save resources in our work."

**Josef Lontscharitsch**  
MANAGER AT GRASSINGER E. U. RADLA – CYCLING DIVISION

"I was looking for a clean solution for my hire bikes, and I found the perfect washing system for me in the BikeGroovy. Clean for the bike, clean for the environment and clean for my customers."

**Bernhard Mildner**  
KALOVEO BIKE HIRE, TRAUN, AUSTRIA

"To be honest, washing bikes isn't my thing. BikeGroovy is much more suited to it. My steed hasn't been this "easy-cheesy" super clean for a long time. And it's gentle on the rear derailleur and the bottom bracket. There's a fantastic side effect for me as someone who cares about the environment: it's good for the environment too. It separates the oil from the water!"

**Arno Hochsteiner**  
CYCLING ENTHUSIAST WHO CYCLES TO WORK ALL YEAR ROUND

"We want to offer added value for visitors to our community, which makes the BikeGroovy bike wash the perfect addition to the Haager Lies cycle path and the neighbouring pump track."

**Andreas Obermair**  
MAYOR OF NEUKIRCHEN BEI LAMBACH, AUSTRIA

"We needed to have our guests' bikes cleaned after tours and the only product that took nature into consideration, by separating oils and heavy dirt from the water, was BikeGroovy. The controlled pressure and the hot water used to pamper the bikes also made the difference. After 2 years, we are very pleased with our choice and recommend it to our colleagues in the hospitality industry."

**Silvio Rigatti**  
OWNER OF AKTIVHOTEL SANTA LUCIA, TORBOLE, LAGO DI GARDA, ITALY
